## *AVIATION TRAINING DEVICES*

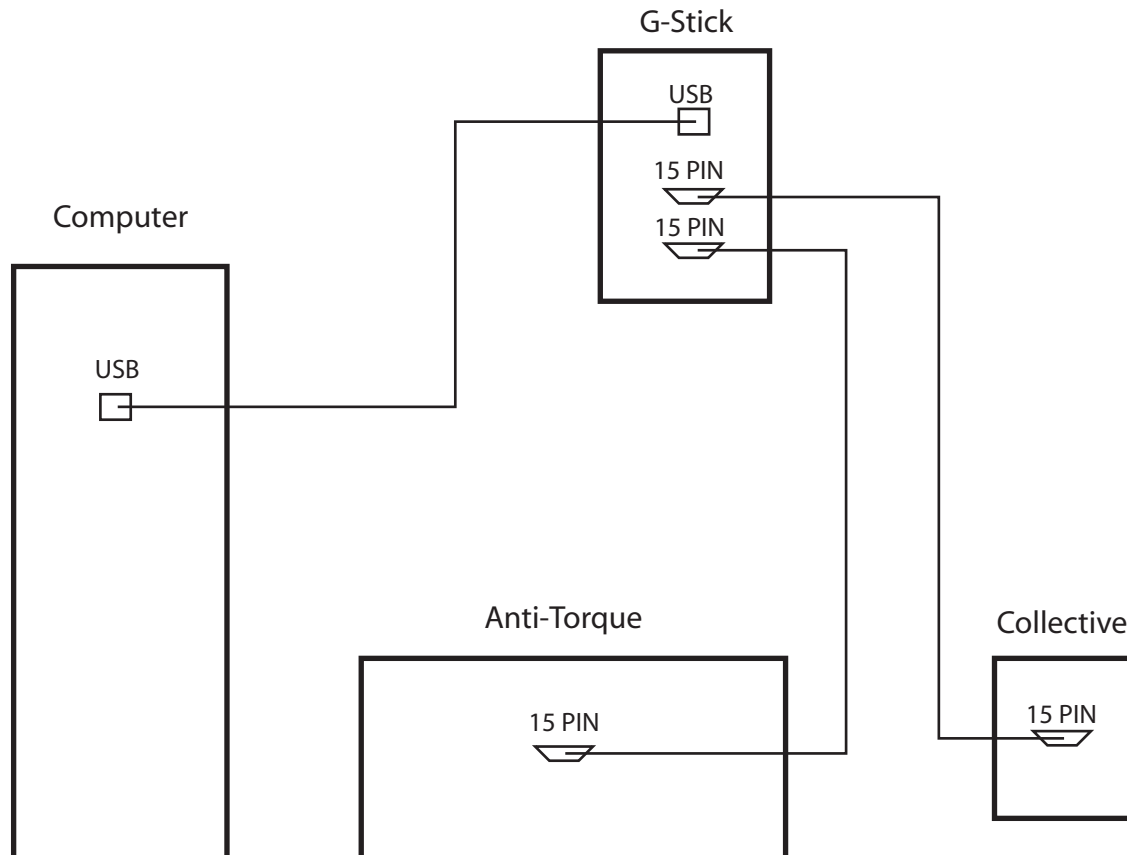

---

Version 2.0A  
October 1st, 2008

Setup diagram for the Advanced Rotor Wing package.

This package includes the G-Stick Cyclic, Anti-Torque Pedals and the C series collective.

(1) USB A/B cable and (2) DB 15 pin cables will be used to connect the control devices.

**Important:**

The Microsoft Windows operating system requires calibration of the controls for correct functionality.

--> Open Game Controllers from the Control Panel and follow the procedures.

**Important:**

The simulator software must be properly setup for correct functionality of the controls.

--> Microsoft Flight Simulator 10 (FSX) or X-Plane 9.X (X9).

--> Assignments configured for aircraft functionality

--> Sensitivites to maximize control response.

--> Realism adjusted for realistic flight.
